

E3 REUSABLE. GOING GREEN: IT'S OUR BRAND NEW BAG.

ENVIRONMENTAL

Our new E3 reusable bag is built for strength and durability. 80 – 100 GSM (grams per square meter) construction and superior stitching give it a life span of more than 2 years under high use conditions.

EFFICIENT

It comes with sewn-in sleeves for ease of loading on your existing rack and is optimized to improve front-end efficiencies. That means quicker loading and transaction time per customer.

EVOLUTIONARY

The E3 bag is the first of its kind to address consumer demand for environmental products without sacrificing front-end efficiency – or your bottom line.

IF OTHER BAGS ARE GREEN.
IT'S WITH ENVY.

KEEP IT SEPARATE. KEEP IT SAFE.

The new SafeGuard Liner

Our new SafeGuard Liner is made from ultra thin plastic, it's smaller than standard liner bags and it's recycleable, to reduce your plastic footprint.

When used for raw meat and cleaning products, the SafeGuard Liner helps to preserve the lifespan of reusable bags, and keeps other foods safe from cross contamination.

**BETTER BAGS.
BETTER WORLD.**
